Summary

Software engineer focused on building **LLM-powered applications** and **Python backend services using FastAPI**. Experienced in **LLM API integration** and **AI workflow orchestration**, with applied machine learning research experience and an **IEEE publication** on explainable Android malware detection.

Technical Skills

Programming: Python, SQL, JavaScript
AI / LLM Applications: LLM API integration, prompt engineering, RAG, embeddings, Groq API
Machine Learning: TensorFlow, scikit-learn, pandas, NumPy, LSTM, CNN, model evaluation, SHAP, LIME
Backend / Frontend: FastAPI, REST APIs, JWT authentication, response streaming, React, React Native
Databases: PostgreSQL, pgvector, MySQL, SQL Server
Tools / Cloud: Git, Azure DevOps, CI/CD, Jira, pytest, Postman

Projects

Logic Lens — AI Code Review Platform Dec 2025 – Jun 2026
Python, FastAPI, React, PostgreSQL/pgvector, Groq API Live Demo | GitHub

- Built and deployed an **LLM-powered code review platform** that turns submitted code into bug explanations, complexity analysis, DSA hints, and corrected-code diffs through the Groq API.
- Connected **React and FastAPI** with response streaming, JWT authentication, saved review history, rate limiting, caching, and structured API error handling.
- Integrated optional **retrieval-augmented generation (RAG)** with document chunking, OpenAI embeddings, and pgvector similarity search to ground code reviews in uploaded documents and display retrieved sources.

CommuteCircle — Privacy-Aware Carpooling Jun 2026 – Present
React Native (Expo), Python, FastAPI, PostgreSQL

- Created the **React Native interface and FastAPI backend foundation** for commuters to offer spare seats and discover rides along their regular routes.
- Implemented **ride creation and browsing** with origin, destination, departure time, and seat availability, backed by PostgreSQL.
- Developing **privacy-aware route matching** around public pickup points, walking-distance limits, and detour constraints to limit disclosure of home addresses.

Professional Experience

Associate Systems Engineer | Tata Consultancy Services Aug 2024 – Nov 2025
Hyderabad, India | Backend APIs, SQL Server, Azure DevOps CI/CD

- Enhanced backend features and REST APIs for an automotive application used **across European markets**, contributing to a **30% reduction in order-processing time**.
- Resolved application defects through **SQL queries, data validation, and log analysis**.
- Tracked tasks, defects, and sprint updates in **Jira** while collaborating with development and QA teams.
- Supported **Azure DevOps CI/CD** workflows, Git version control, release checks, and application deployments.

Research Experience

Android Malware Detection | IBM Security Collaboration Aug 2023 – Jun 2024
Python, TensorFlow, CICMalDroid 2020, Bi-LSTM, CNN, SHAP, LIME

- Evaluated **Bi-LSTM, LSTM-CNN, and BiLSTM-CNN** models for Android malware classification, including preprocessing and validation; achieved **87.9% precision**.
- Interpreted model predictions using **SHAP and LIME** to identify features contributing to malware classification.

Publication: "Towards Explainability Using ML and Deep Learning Models for Malware Threat Detection."
IEEE AIIoT 2024 | IEEE Xplore

Education

Amrita Vishwa Vidyapeetham, Coimbatore 2020 – 2024
Bachelor of Technology in Computer Science and Engineering CGPA: 7.35/10

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Distributed Systems, Machine Learning, Data Mining.

Certifications

AMD AI Academy: AI Agents 101: Building AI Agents with MCP and Open-Source Inference Jul 2026
Google Cloud: Google Cloud Computing Foundations: Data, ML, and AI in Google Cloud
